DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1, 2, 15-17, and 21 are rejected under 35 U.S.C. 102(e) as being anticipated by United States Patent Number 6,198,568 to Galvanauskas et al.

As to claim 1, and 15, Galvanauskas discloses in figure 7d an optical device comprising:

- A first optical fiber having dispersion;
- Supplying an optical signal to said first optical fiber so that said optical signal is compressed on the time axis as propagating in said first optical fiber;
- Supplying a compressed optical signal output from said first optical fiber to an optical device having a saturated gain (Column 10, lines 51-52)

Art Unit: 2874

- Changing, by the optical device, the spectrum of the optical signal.

As to claims 2 and 16, the device has multiple optical fibers connecting devices.

As to claims 17 and 21, the optical amplifier applies a gain saturated in concert with an increase in input power (90, figure 7d and Column 10, lines 51-52)

Claim Objections

3. Claims 3-10, 18-20, 22-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art of record fails to explicitly disclose or reasonably suggest up/down chirping a compressed signal, adjusting the peak power of the compressed signal, providing a dispersion compensator, conjugator, DFB laser and supplying a light source with a different wavelength than the optical signal.

Response to Arguments

4. Applicant's arguments with respect to claims 1-10 and 15-27 on pages 4-6 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- a. United States Patent Number 5,838,487 to Nilsson et al. for optical amplifiers with flat gain spectrums.
- b. United States Patent Number 5,880,877 to Fermann et al. for a fiber amplifier.

Art Unit: 2874

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
